

Are you having trouble
finding an app that :

- Meets public safety security standards?
- Is compliant?
- Is interoperable?
- Is free?

Current Public Safety Chat Landscape

*Pursuing FedRAMP Moderate Authority to Operate (ATO).

Bridge4PS is the
ONLY app on the
market that offers
security, privacy,
transparency,
interoperability,
and enterprise
administration.

Bridge4PS is a secure system built for public safety. We offer a free tier to support critical interoperability. Unlike "free" consumer apps that operate by selling user data, Bridge4PS operates through a combination of federal funding and subscriptions for upgraded licenses. We will NEVER commercialize your data.

*"If you are not paying for it, you're not the customer.
You're the product being sold."*

-Andrew Lewis (@andlewis)

WHY CHOOSE BRIDGE4PS:

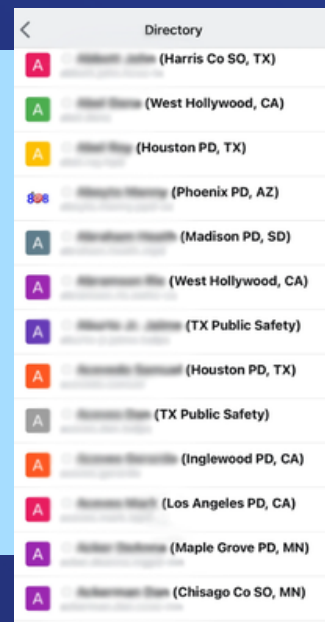

OUR MISSION

Provide public safety with a safe, secure, interoperable and collaborative environment suitable for all operational environments

The Key to Interoperability

Multi-Organizational Directory:

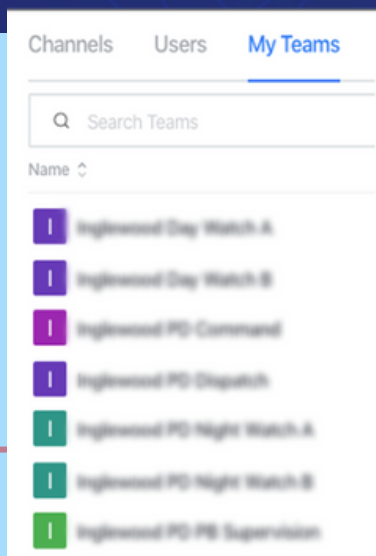

- All registered users are in a single, nationwide directory
- No anonymous members of text groups – all users are identified by name and organization
- Eliminate need for personal contact information
- Any user can be invited to private groups and join public (i.e. open) channels
- Direct messages between any Bridge4PS users

Teams

Key features not available in consumer apps:

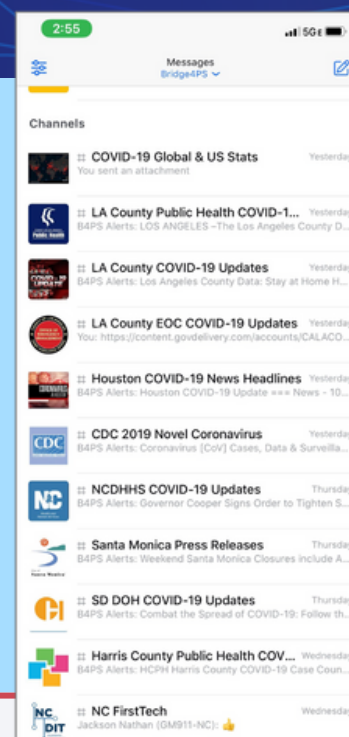

- **Organization** - bulk add/remove users by:
 - organizational units
 - operational requirements
- **Efficiency** - quickly create channels by inviting Teams versus individual users
- **Continuity** - ensure all Team members are invited to all appropriate channels
- **Scalability** - rapid channel setup for large user groups

Channels directory

Public Channels accessible only to Bridge4PS users

- Public Channels allow users to subscribe by topic
- Reduce email clutter
- Improve consumption of information over email distribution
- Features for organizing content by priority, content, individual operation, and more
- Automated Alerts
- Manage Notifications - numerous methods for controlling notifications to ensure you receive pertinent info and cut down on distracting notifications
